

# How to Turn Yourself Into a Cute Anime Girl

1. Choose image with a solid subject (not a messy image).
2. Do some img2img. I usually have denoise 0.4-0.6, Steps 30-40, Euler\_a, CFG 10-16.
3. Prompt is pretty simple. Just describe the scene, tell it what you want to see, add artists, add negatives.
4. Play with prompt and negatives to hone in on your goal.
5. Generate lots of images until it spits out something good.
6. Inpaint trouble spots (eyes, face, things in background, etc).
7. Open the image in an image editor and use the smudge tool to remove male features (broad shoulders, etc).
8. Do another round of inpainting.
9. Do an SD upscale.
10. Redo the face inpainting.
